

## FIBRE OPTIC DOME ENCLOSURE

The DOME24-144S/XX Dome Fibre Optic Splice Closure is used in aerial or wall-mounting applications, for the straight through and branching splice of a fibre cable. The closure has four entrance ports on the end (four round ports and one oval port). The shell of the product is made from ABS. The shell and the base are sealed by pressing the silicone rubber with the clamp provided. The entry ports are sealed by heat-shrinkable tube. The closures can be opened again after being sealed, and reused again without changing the sealing material.

Part Number: **DOME24-144S/XX**

### TECHNICAL SPECIFICATIONS

Dimensions (mm)	ø 190 x 435
Net Weight	2.3kg
Diameter of Cable (mm)	ø 7~ø 22
No. of Cable Inlet/Outlet	5
Number of Fibres per Tray	24
Max. Number of Trays	6
Max. Number of Fibres	144
Sealing of Inlet/Outlet Ports	Heat-shrinkable tube
Sealing of Shells	Silicon rubber
